

### **Amendment to the Claims:**

The listing of claims will replace all prior versions, and listings of claims in the application:

### **Listing of Claims:**

1. (currently amended) A multimedia content delivery system, comprising:

- a content provider ~~having a plurality of~~ providing multimedia files ~~therein~~;
- a first integrated circuit card interface for receipt of a host integrated circuit card containing first authorization information;
- a second integrated circuit card interface for receipt of a user integrated circuit card containing second authorization information;
- an input device for selecting ~~a~~ at least one multimedia file from the plurality of multimedia files;
- an output device for providing the content of ~~a selected~~ at least one authorized multimedia file provided by the content provider to a user of the user integrated circuit; and
- a control unit, responsive to the host and user integrated circuit cards being received in the first and second integrated circuit card interfaces ~~insertion into said second integrated circuit card interface of a user interface card containing second authorization information compatible with~~, which compares the first and second authorization information and when the first and second authorization information is found to be compatible ~~contained in a host integrated circuit card inserted in said first integrated circuit card interface, for actuating~~ actuates said output device to provide the content of ~~a~~ the at least one multimedia file from the content provider

selected by said input device under control of the authorization information which authorizes downloading of the at least one authorized multimedia file through the output device, contained in the first and second authorization information; and wherein the content is not provided from the integrated circuit cards.

2. (Original) A multimedia content delivery system, as claimed in claim 1, further comprising a multimedia terminal having said content provider, said first integrated circuit card interface, and said control unit therein enclosed therein.

3. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said output device comprises an audio output device.

4. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said output device comprises a video output device.

5. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said output device comprises a communication link permitting downloading of the selected multimedia file in electronic form.

6. (Original) A multimedia content delivery system, as claimed in claim 5, wherein said communication link is a wireless communication link.

7. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said content provider, said input device, said output device, and said control

unit comprise a laptop computer.

8. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said content provider, said input device, said output device, and said control unit comprise a wireless personal terminal.

9. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said content provider comprises a server.

10. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said content provider further comprises a mainframe computer coupled to said server.

11. (Original) A multimedia content delivery system, as claimed in claim 1, further comprising a server connected to said content provider.

12. (Original) A multimedia content delivery system, as claimed in claim 1, further comprising a mainframe computer connected to said server.

13. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said multimedia files comprise audio media.

14. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said multimedia files comprise video media.

15. (Original) A multimedia content delivery system, as claimed in claim 14, wherein said video media comprises text.

16. (Original) A multimedia content delivery system, as claimed in claim 15, wherein said text comprises electronic books.

17. (Original) A multimedia content delivery system, as claimed in claim 15, wherein said text comprises newspapers.

18. (Original) A multimedia content delivery system, as claimed in claim 14, wherein said video media comprises games.

19. (Currently Amended) A process for providing multimedia content from a content provider, comprising the steps of:

(a) storing a multimedia file, having the multimedia content, in a storage unit;

(b) providing a first integrated circuit card interface for receiving of a first integrated circuit card containing first authorization information and a second integrated circuit card interface for receiving of a second integrated circuit card containing second authorization information;

(b)-(c) associating first authorization information stored in a-the first integrated circuit card with the-at least one multimedia file provided by the content provider;

(e)-(d) receiving the first integrated circuit card and a-user-the second

integrated circuit card ~~containing second authorization information in the integrated circuit card interfaces~~ and ~~determining if comparing~~ the first authorization information with the ~~second authorization information to determine if the first and second authorization information~~ is compatible with the ~~second authorization information~~; and

~~(d)~~ (e) in response to step ~~(c)~~ (d) when the first and second authorization is determined to be compatible, providing the ~~content of the~~ at least one multimedia file to an output device to provide the at least one multimedia ~~content file~~ from the content ~~providing provider~~ under control of authorization information, contained in the first and second authorization information, which authorizes the downloading of the at least one multimedia file through the output device to a user of the second integrated circuit card; and wherein the content is not provided from the integrated circuit cards.

20. (Original) A process as claimed in claim 19, wherein step (b) comprises receiving a host integrated circuit card containing the first authorization information.

21. (Original) A process as claimed in claim 19, wherein step (d) comprises providing the content of the multimedia file to an audio output device.

22. (Original) A process as claimed in claim 19, wherein step (d) comprises providing the content of the multimedia file to a video output device.

23. (Original) A process as claimed in claim 19, wherein step (d) comprises

providing the content of the multimedia file in electronic form to an output link.

24-28 (cancelled)

29-48. Withdrawn (non-elected claims)

49. (New) A multimedia content delivery system in accordance with claim 1 wherein:

the authorization information indicates a specific multimedia file from the content provider which may be provided by the output device.

50. (New) A multimedia content delivery system in accordance with claim 1 wherein:

the authorization information indicates a group of multimedia files from the content provider which may be provided by the output device.

51. (New) A multimedia content delivery system in accordance with claim 1 wherein:

the authorization information indicates a category of multimedia files from the content provider which may be provided by the output device.

52. (New) A multimedia content delivery system in accordance with claim 1 wherein:

the authorization information indicates a maximum number of

multimedia files which may be provided by the output device.

53. (New) A multimedia content delivery system in accordance with claim 1 wherein:

the authorization information indicates a maximum monetary value of multimedia files that user is authorized to download.

54. (New) A process in accordance with claim 19 wherein:

the authorization information indicates a specific multimedia file from the content provider which may be provided by the output device.

55. (New) A process in accordance with claim 19 wherein:

the authorization information indicates a group of multimedia files from the content provider which may be provided by the output device.

56. (New) A process in accordance with claim 19 wherein:

the authorization information indicates a category of multimedia files from the content provider which may be provided by the output device.

57. (New) A process in accordance with claim 19 wherein:

the authorization information indicates a maximum number of multimedia files which may be provided by the output device.

58. (New) A process in accordance with claim 19 wherein:

the authorization information indicates a maximum monetary value of multimedia files that user is authorized to download.
